LOST AND FOUND

Can you name the instruments in these "ads"? What "family" do they belong to?

6. **Found:** Musical instrument. Made mostly of wood. Has four metal wires attached to pegs on one end. Also has a long wooden stick with white horsehair attached. About 6' long. Please claim it – it's taking up a lot of space in my house!
7. **Lost:** Black wood tube. Lots of silver buttons and rods. Two thin pieces of wood stick out on one end.
8. **Lost:** Large instrument made of wooden bars mounted on a frame. I love to beat them with sticks to make music. ***Reward offered!***
9. **Found:** Black wood tube about 2' long with silver buttons covering holes. Has a small piece of cane stuck onto wedge-shaped piece on one end. Bottom flares into bell shape. Don't know what it is.
10. **Found:** Very odd looking brass implement. Has a flared end, folded over so that it is in the middle of the thing! Part of it can slide in and out.
11. **Found:** Something that looks like a big copper kettle! It has a thin skin stretched over the top, and a pedal on the bottom. Rolls on wheels.
12. **Found:** LARGE box, with hundreds of wires inside. Has a bunch of small black and white pieces on a ledge on the outside. This thing is H E A V Y!
